REACH Customer Information

Issued: 21 October 2026 | Reference: ECHA Candidate List of SVHC (253 entries; latest listed inclusion: 4 February 2026)

Regulatory framework

Regulation (EC) No 1907/2006 (REACH) establishes requirements concerning the registration, evaluation, authorisation and restriction of chemicals. PET HARDWARE supplies products which, in general, qualify as articles within the meaning of Article 3(3) of REACH.

Substances of very high concern (SVHC)

We monitor the Candidate List of substances of very high concern published by the European Chemicals Agency (ECHA) and seek relevant composition and compliance information from our suppliers. The Candidate List referenced for this information notice contains 253 entries as verified on the issue date.

Under Article 33(1) of REACH, where an article contains a Candidate List substance at a concentration above 0.1% weight by weight (w/w), the supplier must provide the recipient with sufficient information to allow safe use of the article, including at least the name of that substance. For products consisting of multiple component articles, this threshold must be assessed for each constituent article as applicable.

Under Article 33(2), consumers may request this information; where applicable it must be provided free of charge within 45 days. We will respond to relevant inquiries and communicate substance-specific information where required.

Authorisation and restrictions

We take into account applicable REACH requirements, including relevant restrictions under Annex XVII and, where applicable to our activities, requirements relating to substances listed in Annex XIV. The Candidate List, Annex XIV and Annex XVII have different legal functions and are assessed separately.

Scope of this statement

This document describes PET HARDWARE's approach to REACH-related supply-chain communication. It is not a product-specific analytical certificate and does not, on its own, certify that all supplied articles are free from Candidate List substances or that every product meets every applicable restriction. Product-specific information can be provided on request, subject to the technical information available for the relevant product, material, finish and supplier.
